**Answer: B**

**NEW QUESTION: 3**

What influences decisions regarding criticality of assets?

- A.** The business criticality of the data to be protected, and the scope of the impact upon the organization as a whole
- B.** The business impact analysis
- C.** The business criticality of the data to be protected
- D.** Internal corporate politics

**Answer: A**

Explanation:

Explanation/Reference:

Explanation:

Criticality of assets is often influenced by the business criticality of the data to be protected and by the scope of the impact upon the organization as a whole. For example, the loss of a network backbone creates a much greater impact on the organization as a whole than the loss of data on a typical user's workstation.

**NEW QUESTION: 4**

At which layer of ISO/OSI does the fiber optics work?

- A.** Network layer
- B.** Physical layer
- C.** Data link layer
- D.** Transport layer

**Answer: B**

Explanation:

The Answer: Physical layer The Physical layer is responsible for the transmission of the data through the physical medium. This includes such things as cables.

Fiber optics is a cabling mechanism which works at Physical layer of OSI model

All of the other answers are incorrect.

The following reference(s) were/was used to create this question:

Shon Harris all in one - Chapter 7 (Cabling)
