NEW QUESTION: 1

A customer wants to back up its Veritas environment via S3 protocol. The customer also needs a copy of that data available offsite at its remote disaster recovery site.

Which IBM solution should the sales specialist recommend?

- A. IBM Spectrum Protect for Workstations
- B. IBM Storwize V7000 and Global Mirror to a remote IBM Storwize V7000
- C. IBM Cloud Object Storage
- D. IBM TS4300 and a remote TS4300

Answer: C

NEW QUESTION: 2

Please wait while the virtual machine loads. Once loaded, you may proceed to the lab section. This may take a few minutes,

and the wait time will not be deducted from your overall test time.

When the Next button is available, click it to access the lab section. In this section, you will perform a set of tasks in a live environment. While most functionality will be available to you as it would be in a live environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design.

Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn't matter how you accomplish the task, if you successfully perform it, you will earn credit for that task.

Labs are not timed separately, and this exam may more than one lab that you must complete. You can use as much time as you would like to complete each lab. But, you should manage your time appropriately to ensure that you are able to complete the lab(s) and all other sections of the exam in the time provided. Please note that once you submit your work by clicking the Next button within a lab, you will NOT be able to return to the lab. Username and password

Use the following login credentials as needed:

To enter your username, place your cursor in the Sign in box and click on the username below.

To enter your password, place your cursor in the Enter password box and click on the password below.

Microsoft 365 Username:

[\[email protected\]](#)@onmicrosoft.com

Microsoft 365 Password: #HSP.ug?\$p6un

If the Microsoft 365 portal does not load successfully in the browser, press CTRL-K to reload the portal in a new browser tab.

Lab instance: 11122308

You need to protect against phishing attacks. The solution must meet the following requirements:

- * Phishing email messages must be quarantined if the messages are sent from a spoofed domain.

- * As many phishing email messages as possible must be identified.

The solution must apply to the current SMTP domain names and any domain names added later.

To complete this task, sign in to the Microsoft 365 admin center.

Answer:

Explanation:

See explanation below.

Explanation

1. After signing in to the Microsoft 365 admin center, select Security, Threat Management, Policy, then ATP Anti-phishing.
2. Select Default Policy to refine it.
3. In the Impersonation section, select Edit.
4. Go to Add domains to protect and select the toggle to automatically include the domains you own.
5. Go to Actions, open the drop-down If email is sent by an impersonated user, and choose the Quarantine message action. Open the drop-down If email is sent by an impersonated domain and choose the Quarantine message action.
6. Select Turn on impersonation safety tips. Choose whether tips should be provided to users when the system detects impersonated users, domains, or unusual characters. Select
7. Select Mailbox intelligence and verify that it's turned on. This allows your email to be more efficient by learning usage patterns.
8. Choose Add trusted senders and domains. Here you can add email addresses or domains that shouldn't be classified as an impersonation.
9. Choose Review your settings, make sure everything is correct, select , then Close.

NEW QUESTION: 3

2012 Feb 23 23:00:08.676710 pim: [16132] (default-base)
Received unauthenticated hello-message from 10.1.1.2 on
Ethernet1/18, message discarded

2012 Feb 23 23:00:12.528763 pim: [16132] (default-base) Send
Hello with AH on Ethernet1/18 from 10.1.1.1, holdtimeE. 105
secs, dr-priority: 1 You are troubleshooting a PIM neighbor
adjacency that is not coming up. You issued the command show ip
pim neighbor e1/18 and confirmed there is no PIM neighbor on
the interface.

What is the problem based on the debug output?

- A.** The local router 10.1.1.1 has the wrong PIM password configured on Ethernet1/18.
- B.** The peer router 10.1.1.2 has PIM disabled on its interface connecting to Ethernet1/18.
- C.** The local router 10.1.1.1 does not have PIM hello authentication enabled for Ethernet1/18.
- D.** The peer router 10.1.1.2 has the wrong PIM password configured on its interface connecting to Ethernet1/18.
- E.** The peer router 10.1.1.2 does not have PIM hello

authentication enabled on its interface connecting to Ethernet1/18.

Answer: E

NEW QUESTION: 4

How can WebSphere Service Registry & Repository (WSRR) information be pre-loaded into the IBM Integration BUS (IIB) cache before sending any messages to the message flow?

A. WSRR data cannot be loaded into the IBB cache without sending a message that accesses the WSRR node.

B. By using the predefinedCacheQueries parameter in the Configurable Services for the broker.

C. Adding predefinedCacheQueries to a custom policy within WSRR.

D. By subscribing to WSRR notifications.

Answer: B

Explanation:

Explanation/Reference:

Explanation:

Enabling cache preloading

After the query file is created and placed on the server, configure the broker to use the text file at execution group start up. The change properties command will be used to achieve this and is accomplished by running the following command:

Command to enable preloading of the WSRR cache from file
mqschangeproperties <broker_name> -c ServiceRegistries
-p

"<wsrr_query_text_file>" -o DefaultWSRR -n
predefinedCacheQueries

Replace <broker_name> with the name of the broker that is being used. Replace <wsrr_query_text_file> with the absolute file path location and name of the query file.
