Answer: B

NEW QUESTION: 2

You want to deploy Oracle Solans 11 with the Automated Installer (AI). You need to make sure that your server and network meet the requirements for using AI. Choose the three options that describe the requirements for using AI. (Choose three.)

- A.** You must set up DHCP. The DHCP server and AI install server can be the same machine or two different machines.
- B.** You can create only one manifest per install service. If you need more than one manifest, create multiple install services.
- C.** If two client machines have different architectures and need to be installed with the same version of the Oracle Solaris 11 OS(then create two AI manifests and a single install service.
- D.** Load the install/installadm package on the AI server.
- E.** The minimum requirement to operate as an AI install server is 1 GB of memory.

Answer: A,C,D
