NEW QUESTION: 1
You need to apply a form pattern to the Vendor exclusion list. Which pattern should you use?
A. List Page
B. Workspace
C. List View
D. Simple List
Answer: A

NEW QUESTION: 2
Your company has an intranet site that is hosted on Microsoft SharePoint Online. The site uses the default Team Site template. Users create 75 subsites. Many of the subsites do not inherit permissions from the parent site.
You need to ensure that a specific user can administer all the subsites.
You must accomplish this goal by using the least amount of effort.
What should you do?
A. From the site settings of the root site, assign the user the Full Control permission to the root site.
B. From the SharePoint Online Administration Center, add a user profile property named Administrator and set the property value to True for the user.

C. From the site settings of the root site, add the user to the Site Collection Administrators group.
D. From the site settings of the root site, add the user to the Hierarchy Managers group.
Answer: C

NEW QUESTION: 3
Note: This question is part of a series of questions that use the same or similar answer choices. An answer choice may be correct for more than one question in the series. Each question is independent of the other questions in this series. Information and details provided in a question apply only to that question.
You need to deploy an HDInsight cluster. The cluster will host a low-latency NoSQL database that uses the key/value pair format in a columnar model. The cluster has the following requirements:
Supports SSH access
Supports autosharding
Uses Azure Data Lake Store as the default storage
What should you do?
A. Use an Azure PowerShell script to create a standard HDInsight cluster. Specify Apache HBase as the cluster type and use Windows as the operating system.
B. Use an Azure PowerShell script to create a premium HDInsight cluster. Specify Apache HBase as the cluster type and use Linux as the operating system.
C. Use an Azure PowerShell script to create and configure a premium HDInsight cluster. Specify Apache Hadoop as the cluster type and use Linux as the operating system.
D. Use the Azure portal to create a standard HDInsight cluster. Specify Apache Spark as the cluster type and use Linux as the operating system.
E. Use an Azure portal to create a standard HDInsight cluster. Specify Apache HBase as the cluster type and use Linux as the operating system.
F. Use an Azure PowerShell script to create a standard HDInsight cluster. Specify Apache Storm as the cluster type and use Windows as the operating system.
G. Use an Azure portal to create a standard HDInsight cluster. Specify Apache Interactive Hive as the cluster type and use Linux as the operating system.
Answer: E
