If you really want to pass the exam, this must be the one that makes you feel the most, As long as you study with our H35-211\_V2.5-ENU practice engine, you will find they can help you get the best percentage on your way to success.

You can see it is clear that there are only benefits for you to buy our Huawei H35-211\_V2.5-ENU exam resources, so why not have a try, And H35-211\_V2.5-ENU test torrent materials will be your chance to flex your muscles to show your abilities and stand out above the average.

**NEW QUESTION: 1A.** access-list 1 permit 172.16.10.0 0.0.0.255!interface e0ip policy route-map policy!route- map policy permit 10match ip address 1set ip next-hop 172.16.12.2**B.** access-list 1 permit 172.16.10.0 0.0.0.255!interface s0ip policy route-map policy!route- map policy permit 10match ip address 1set ip next-hop 172.16.12.3**C.** access-list 1 permit 172.16.10.0 0.0.0.255!interface e0ip policy route-map policy!route- map policy permit 10match ip address 1set ip next-hop 172.16.14.4**D.** access-list 1 deny 172.16.10.0 0.0.0.255!interface s0ip policy route-map policy!route- map policy permit 10match ip address 1set ip next-hop 172.16.12.2  
**Answer: B**Explanation:ExplanationThe "next-hop" IP address

should be the E1 interface of router C (172.16.12.3).

**NEW QUESTION: 2**Case Study: 4 - Dress4Win case studyCompany OverviewDress4win is a web-based company that helps their users organize and manage their personal wardrobe using a website and mobile application. The company also cultivates an active social network that connects their users with designers and retailers. They monetize their services through advertising, e-commerce, referrals, and a freemium app model.Company BackgroundDress4win's application has grown from a few servers in the founder's garage to several hundred servers and appliances in a colocated data center. However, the capacity of their infrastructure is now insufficient for the application's rapid growth. Because of this growth and the company's desire to innovate faster, Dress4win is committing to a full migration to a public cloud.Solution ConceptFor the first phase of their migration to the cloud, Dress4win is considering moving their development and test environments. They are also considering building a disaster recovery site, because their current infrastructure is at a single location. They are not sure which components of their architecture they can migrate as is and which components they need to change before migrating them.Existing Technical EnvironmentThe Dress4win application is served out of a single data center location.Databases:MySQL - user data, inventory, static dataRedis - metadata, social graph, cachingApplication servers:Tomcat - Java micro-servicesNginx - static contentApache Beam - Batch processingStorage appliances:iSCSI for VM hostsFiber channel SAN - MySQL databasesNAS - image storage, logs, backupsApache Hadoop/Spark servers:Data analysisReal-time trending calculationsMQ servers: MessagingSocial notificationsEventsMiscellaneous servers: Jenkins, monitoring, bastion hosts, security scannersBusiness RequirementsBuild a reliable and reproducible environment with scaled parity of production. Improve security by defining and adhering to a set of security and Identity and Access Management (IAM) best practices for cloud.Improve business agility and speed of innovation through rapid provisioning of new resources.Analyze and optimize architecture for performance in the cloud. Migrate fully to the cloud if all other requirements are met.Technical RequirementsEvaluate and choose an automation framework for provisioning resources in cloud. Support failover of the production environment to cloud during an emergency. Identify production services that can migrate to cloud to save capacity.Use managed services whenever possible. Encrypt data on the wire and at rest.Support multiple VPN connections between the production data center and cloud environment.CEO StatementOur investors are concerned about our ability to scale and contain costs with our current infrastructure. They are also concerned that a new competitor could use a public cloud platform to offset their up-front investment and freeing them to focus on developing better features.CTO StatementWe have invested heavily in the current infrastructure, but much of the equipment is approaching the

end of its useful life. We are consistently waiting weeks for new gear to be racked before we can start new projects. Our traffic patterns are highest in the mornings and weekend evenings; during other times, 80% of our capacity is sitting idle. CFO Statement Our capital expenditure is now exceeding our quarterly projections. Migrating to the cloud will likely cause an initial increase in spending, but we expect to fully transition before our next hardware refresh cycle. Our total cost of ownership (TCO) analysis over the next 5 years puts a cloud strategy between 30 to 50% lower than our current model. For this question, refer to the Dress4Win case study. The Dress4Win security team has disabled external SSH access into production virtual machines (VMs) on Google Cloud Platform (GCP). The operations team needs to remotely manage the VMs, build and push Docker containers, and manage Google Cloud Storage objects. What can they do? **A.** Configure a VPN connection to GCP to allow SSH access to the cloud VMs. **B.** Develop a new access request process that grants temporary SSH access to cloud VMs when an operations engineer needs to perform a task. **C.** Have the development team build an API service that allows the operations team to execute specific remote procedure calls to accomplish their tasks. **D.** Grant the operations engineers access to use Google Cloud Shell. **Answer: A**

**NEW QUESTION: 3** Which tasks will create and vary on a new volume group for an existing resource group in a 2node cluster? **A.** Create a new volume group for the resource group using PowerHA SMIT Menu "Create a Volume Group" on node1 Run PowerHA SMIT Menu "Verify and Synchronize Cluster Configuration" **B.** Create a new volume group for the resource group using cl\_mkgv command with C-SPOC option on node1 Run PowerHA SMIT Menu "Synchronize a Volume Group Definition" **C.** Create a new volume group using mkgv command on node1 and run importvg on node2 Run PowerHA SMIT Menu "Import a Volume Group" to import the volume group for the resource group **D.** Create a new volume group for the resource group using PowerHA SMIT Menu "Configure Storage Resources" on node1 Run PowerHA SMIT Menu "Synchronize a Volume Group Definition" **Answer: A**

**NEW QUESTION: 4** Sie haben ein Azure-Abonnement mit dem Namen Abonnement1, das ein virtuelles Netzwerk mit dem Namen VNet1 enthält. Sie fügen die Benutzer in der folgenden Tabelle hinzu. Welches? Wählen Sie zum Beantworten die entsprechenden Optionen im Antwortbereich aus. HINWEIS: Jede richtige Auswahl ist einen Punkt wert. **Answer:** Explanation: Explanation: Box 1: User1 and User3 only. The Owner Role lets you manage everything, including access to resources. The Network Contributor role lets you manage networks, but not access to them. Box 2: User1 and User2 only. The Security Admin role: In Security Center only: Can view security policies, view security states, edit security policies, view alerts and recommendations, dismiss alerts and recommendations.
