NEW QUESTION: 2A. Option BB. Option DC. Option CD. Option A
Answer: CExplanation:The files needed are no longer available on the local Hard drive. We need to connect the server to the Internet. Important to note that when starting with Windows Server 2012 R2 and Windows 8, the feature files for .NET Framework 3.5 (which includes .NET Framework 2.0 and .NET Framework 3.0) are not available on the local computer by default. The files have been removed. Files for features that have been removed in a Features on Demand configuration, along with feature files for .NET Framework 3.5, are available through Windows Update. By default, if feature files are not available on the destination server that is running Windows Server 2012 R2 R2 Preview or Windows Server 2012 R2, the installation process searches for the missing files by connecting to Windows Update. You can override the default behavior by configuring a Group Policy setting or specifying an alternate source path during installation, whether you are installing by using the Add Roles and Features Wizard GUI or a command line.Reference:Exam Ref 70-410: Installing and Configuring Windows Server 2012 R2, Chapter 2: Configure server roles and Features, p. 117Training Guide: Installing and Configuring Windows Server 2012 R2, Chapter 2: Deploying servers, p. 80
