**Answer: B**

**NEW QUESTION: 2**

A. Option A

B. Option C

C. Option B

D. Option D

**Answer: D**

Explanation:

Since all the same router (C-router) is the default gateway for all three VLANs, all traffic destined to a different VLA will be sent to the C-router. The C-router will have knowledge of all three networks since they will appear as directly connected in the routing table. Since the C-router already knows how to get to all three networks, no routing protocols need to be configured.

**NEW QUESTION: 3**

The IBM Security SiteProtector Systems V2.0 SP8.1 (SiteProtector) Console Agent Update status of a core component shows Current. However the version shown in this view is not correct and out of date. What information does SiteProtector use to calculate whether the version is current?
