Some people may think it's hard to pass MB-310 real test, Now you can have these precious materials, They used their knowledge and experience as well as the ever-changing IT industry to produce the material.

Here are the reasons you should choose us, A good test questions will make you learn effectively, It is known to us all that practice makes everything perfect, Samrock MB-310 Microsoft Microsoft Dynamics 365 Certification Exam.

**NEW QUESTION: 1**To investigate the slow response time of queries on the TRANS table, you gathered the table statistics and executed the query:The table is stored in a tablespace that has Automatic Segment Space Management (ASSM) enabled. The tablespace is created with a standard block size of 8192 bytes. Which three can be reasons for the slow response time of the queries? (Choose three.)**A.** The value of PCTFREE is set to a value lower than the default, causing row chaining.**B.** Row moves from one data block to another data block because the row grows too large to fit in the original block.**C.** The table is subject to frequent insert, update, and delete DML activity leading to sparsely populated blocks.**D.** The value of PCTUSED is set to a value lower than the default, causing row chaining.**E.** Row size is too large to fit into a single block during insert operations.**Answer: B,D,E**

**NEW QUESTION: 2**Click to expand each objective. To connect to the Azure portal, type <https://portal.azure.com> in the browser address bar.When you are finished performing all the tasks, click the 'Next' button.Note that you cannot return to the lab once you click the 'Next' button. Scoring occur in the background while you complete the rest of the exam.OverviewThe following section of the exam is a lab. In this section, you will perform a set of tasks in a live environment. While most functionality will be available to you as it would be in a live

environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design. Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn't matter how you accomplish the task, if you successfully perform it, you will earn credit for that task. Labs are not timed separately, and this exam may have more than one lab that you must complete. You can use as much time as you would like to complete each lab. But, you should manage your time appropriately to ensure that you are able to complete the lab(s) and all other sections of the exam in the time provided. Please note that once you submit your work by clicking the Next button within a lab, you will NOT be able to return to the lab. To start the lab you may start the lab by clicking the Next button. You plan to deploy several Azure virtual machines and to connect them to a virtual network named VNET1007. You need to ensure that future virtual machines on VNET1007 can register their name in an internal DNS zone named corp8548984.com. The zone must be hosted on a virtual machine. What should you do from Azure Cloud Shell?

**Answer:** Explanation: To complete this task, start Azure Cloud Shell and select PowerShell (Linux), Click Show Advanced settings, and then enter corp8548984nl in the Storage account text box and File1 share text box. Click Create storage, and then complete the task. See solution below. Explanation Step 1: Launch Cloud Shell from the top navigation of the Azure portal. Step 2: Select PowerShell When you start the Azure Cloud Shell for the first time, you will be prompted to create a storage account in order to associate a new Azure File Share to persist files across sessions. Step 3: Click Show Advanced settings. Step 4: Enter corp8548984nl in the Storage account text box and File1 share text box. Click Create storage. Step 5: Enter the following command at the powershell command prompt:

```
New-AzDnsZone -Name "corp8548984.com"-ResourceGroupName "mycloudshell"-ZoneType Private-RegistrationVirtualNetworkId VNET1007
```

Note: A DNS zone is created by using the New-AzDnsZone cmdlet with a value of Private for the ZoneType parameter.
