Which of the following proxy servers provides administrative controls over the content?

- A. Caching proxy server
- B. Content filtering web proxy server
- C. Web proxy server
- D. Forced proxy server

Answer: B

NEW QUESTION: 2

Your company is implementing Network Access Protection (NAP) with DHCP enforcement. You need to define which network resources non-compliant client computers can access.

What should you configure?

- A. health policies
- B. system health validators (SHVs)
- C. remediation server groups
- D. connection request policies

Answer: C

Explanation:

Remediation server groups are used to specify servers that are available to noncompliant Network Access Protection (NAP) clients for the purpose of remediating their health state to comply with health requirements. The type of remediation servers that are required depend on your health requirements and network access methods.
