Answer: C

NEW QUESTION: 3
An administrator wishes to replace a legacy clinical software
product as it has become a security risk. The legacy product
generates $10,000 in revenue a month. The new software product
has an initial cost of $180,000 and a yearly maintenance of
$2,000 after the first year. However, it will generate $15,000
in revenue per month and be more secure. How many years until
there is a return on investment for this new package?
A. 0
B. 1
C. 2
D. 3
Answer: D
Explanation:
Return on investment = Net profit / Investment
where:
Profit for the first year is $60 000, second year = $ 120 000 ;
third year = $ 180 000 ; and fourth year = $ 240 000
investment in first year = $ 180 000, by year 2 = $ 182 000; by
year 3 = $ 184 000 ; and by year 4 = $ 186 000
Thus you will only get a return on the investment in 4 years'
time.
