We have always set great store by superior after sale service, since we all tend to take responsibility for our customers who decide to choose our SSM training materials.

We have received feedbacks from our customers that the passing rate is 98 to 100 percent and are still increasing based on the desirable data now, Our SSM practice material suits you best.

On the other hand, our Scrum SSM dumps are fast updated, and it will be updated with the quickest speed once the actual examination content change.

NEW QUESTION: 1As the manager of a mission-critical application development project, you oversee the technical delivery of a software application. The project has not met any of its milestones, and there are early signs that what requested. Each iteration is taking approximately three weeks longer to finish than available is being produced is not what the stakeholders have was scheduled. No more resources will be made available. You need to reduce the cycle time without impacting commitments. Which two actions should you perform? (Each correct answer presents a complete solution. Choose two.)**A.** Reduce (or remove) cycle requirements for quality assurance (QA) and user acceptance testing (UAT). Reorganize the project team to have all hands working on development tasks until the backlog has been caught up to schedule.**B.** Work with your technical leads to remove any features from the end product that, on paper, make up the difference in project delays. Then inform the stakeholders what you will patch in later.**C.** Create a technical oversight committee that will meet and review all project work and identify areas for improvement for the next cycle.**D.** Analyze the complexity of the work in progress (WIP) and determine if there is any way to simplify the tasks.**E.** Identify and remove wait times in the development cycle.**Answer: D,E**

NEW QUESTION: 2 HOTSPOT You manage a network that includes an on-premises Active Directory Domain Services domain and an Azure Active Directory (Azure AD). Employees are required to use different accounts when using on-premises or cloud resources. You must recommend a solution that lets employees sign in to all company resources by using a single account. The solution must implement an identity provider. You need provide guidance on the different identity providers. How should you describe each identity provider? To answer, select the appropriate description from each list in the answer area. NOTE: Each correct selection is worth one point. Hot Area: **Answer:**

Explanation: Explanation/Reference: Explanation: Synchronized identity is the simplest way to synchronize on-premises directory objects (users and groups) with Azure AD. While synchronized identity is the easiest and quickest method, your users still need to maintain a separate password for cloud-based resources. To avoid this, you can also (optionally) synchronize a hash of user passwords to your Azure AD directory. Synchronizing password hashes enables users to log in to cloud-based organizational resources with the same user name and password that they use on-premises. Azure AD Connect periodically checks your on-premises directory for changes and keeps your Azure AD directory synchronized. When a user attribute or password is changed on-premises Active Directory, it is automatically updated in Azure AD. Federated identity: For more control over how users access Office 365 and other cloud services, you can set up directory synchronization with single sign-on (SSO) using Active Directory Federation Services (AD FS). Federating your user's sign-ins with AD FS delegates authentication to an on-premises server that validates user credentials. In this model, on-premises Active Directory credentials are never passed to Azure AD. Reference: <https://docs.microsoft.com/en-us/azure/active-directory/choose-hybrid-identity-solution#synchronized-identity>

NEW QUESTION: 3 Which command should an administrator use to clear the failing flag on a disk? **A.** vxmend **B.** vxrecover **C.** vxedit **D.** vxreattach **Answer: C**

NEW QUESTION: 4

Contract defines the roles and responsibilities for risk management between a cloud provider and a cloud customer. **Answer: C**
