**NEW QUESTION: 1**

A customer is planning to install two XIV storage systems with synchronous mirroring. The two storage systems will be in separate data centers approximately 50 km apart. The technical specialist has been asked what guidelines should be followed to avoid degraded host I/O.

Which guideline should the technical specialist discuss?

- A. the link between sites must support the full peak host write rate
- B. if a single link is used between sites, then only connect one module per XIV system to each other
- C. the link between sites must support minimum speed of 50 Mbps per FC connection
- D. use interval schedule named "Never" to configure the synchronous mirror

**Answer: A**

**NEW QUESTION: 2**

You have 100 computers that run Windows 10. You have no servers. All the computers are joined to Microsoft Azure Active Directory (Azure AD).

The computers have different update settings, and some computers are configured for manual updates.

You need to configure Windows Update. The solution must meet the following requirements:

- \* The configuration must be managed from a central location.
- \* Internet traffic must be minimized.
- \* Costs must be minimized.

How should you configure Windows Update? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

**Answer:**

Explanation:
